

Ramp profiles for commercial use, no screws

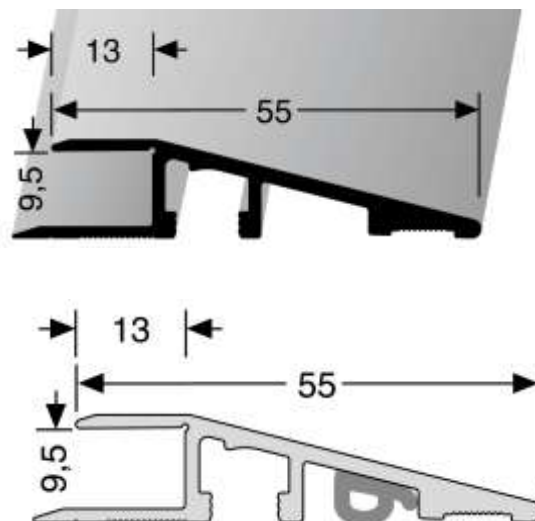

Description:

- High and low ramp profiles with pre-cut 90° corners
- Specially developed for commercial use and high footfall areas
- Resistant to loads of heavy trolleys
- Perfect for islands and floating constructions on top of another floor
- Perfect for areas where no screws in the subfloor are allowed
- EPDM moulding and plastic connectors included

Detailed technical drawing low ramp profile:

Ramp profiles for commercial use, no screws

Properties	Value
Material	Anodised Aluminium
Surface	Scratch resistant
Colours	Silver. UV protected
Connection	Plastic connectors
Water protection	EPDM moulding

Demographics:

Product	Length mm	Width mm	Height mm	Height mm	Quantity/pack pcs
Low ramp profile	3150	55	12,55	1,5*	10
Corner to low ramp profile	200x200	55	12,55	1,5*	4
High ramp profile	3150	84	24	1,5*	5
Corner to high ramp profile	200x200	84	24	1,5*	4

*over flooring surface

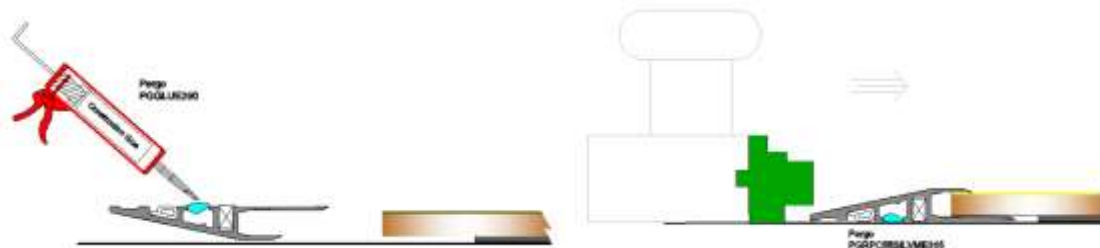

Installation instruction:

Installation instruction:

Low ramp profile:

Suitable for floors between 8-9 mm (excl. underlay).

If installed with public Extreme, remove 30 mm of the Professional Performance Soundbloc™ with a cutter. Add construction glue under the profile and tap the profile to place leaving both an expansion space of 5mm and a coverage of 5mm. Attach the profiles together and the corners using the plastic connectors included in the package to ensure a perfect alignment.

High ramp profile:

Suitable for flooring constructions of 22,5 mm (excl. underlay). Add construction glue under the profile and tap the profile to place leaving both an expansion space of 5mm and a coverage of 5mm. Attach the profiles together and the corners using the plastic connectors included in the package to ensure a perfect alignment.
